

Pg 4 3D Dinosaur Project Inkjet Printer Settings with 3DMasterKit

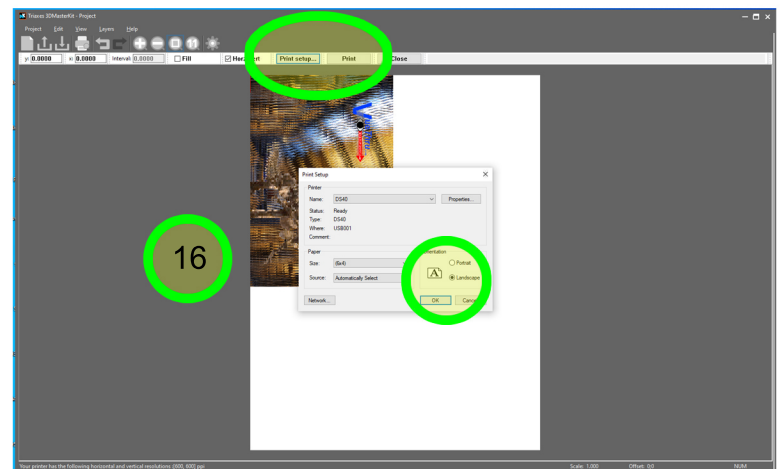

15 3DMasterKit will Display the image with to Registration Marks for your review and printing. You can make changes or Select the Printer Icon to setup your Inkjet Printer.

Follow on screen instructions and Rotate Print image as necessary for proper Lenticular Printing.

Scroll down for Lamination instructions.

16 **Setup Printer and Print by Clicking the Printer Icon** and Clicking OK. If necessary rotate image for correct printing.

17 To **Save Print File** Click Generate to File. Default is BMP, but we prefer PSD or TIF.

To Save the Project File Click on Project in the upper left and Save your project will Save all your Settings!
